THE MARYLAND INSTITUTE, COLLEGE OF ART

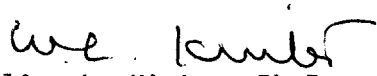

September 16, 1971

Dr. Joshua Lederberg  
Prof. of Genetics  
Stanford University  
School of Medicine  
Stanford, California

Dear Dr. Lederberg:

I am very grateful for the article, "Risks of Hurricane Tamino," which appeared in the Washington Post, 12 September 1971. The Tri-State Natural Weather Association, of which I am Secretary, has been collecting evidence on the disastrous effects of uncontrolled cloud seeding for years. Our area, the Potomac Basin - Apple Belt has been dried out, while floods have occurred downwind. You no doubt know of Dr. Langmuir's warnings. I will be glad to send you our key evidence. May I hope for your help in our battle to bring about effective legislative control.

Very sincerely yours,

  
William L. Kinter, Ph.D.  
Co-chairman, Division of Liberal Arts
